Summary

Frontend-focused Software Engineering student experienced in building scalable user interfaces for SaaS platforms and collaborating closely with engineering teams to deliver production-ready features. Skilled in translating design systems into modular UI components, integrating REST APIs, and ensuring reliable frontend-backend communication. Strong interest in modern frontend architecture, performance optimization, and building maintainable interfaces for cloud and enterprise applications.

Experience

Frontend Developer & UX/UI Designer, Human Factor (SaaS) Feb 2024 – Present

- Designed and maintained a scalable **Design System** using Figma and reusable component structures, improving consistency and accelerating frontend implementation.
- Optimized design workflows by integrating **Figma MCP with Claude**, automating component adjustments and increasing design production efficiency by approximately **30%**.
- Developed complex **dashboard interfaces and data visualization components** to support operational decision-making across the platform.
- Contributed to product architecture discussions and supported agile development workflows using Git-based version control.

Education

Centro Universitário Ingá, Bachelor in Software Engineering Feb 2025 – Dec 2028

Academic Projects

Academic Management App – University

- Mobile application developed for managing student records, attendance tracking, certificates, and academic schedules.
- Implemented frontend interfaces using **Flutter**, structuring authentication flows and scalable navigation architecture.
- Designed modular UI screens focused on usability, accessibility, and maintainable component structure.
- Stack: **Flutter, Dart, Oracle**

Inventory Management System – Municipal Government

- Developed an administrative system in Oracle APEX to track and manage municipal inventory assets.
- Designed and implemented frontend interface structures prioritizing usability, visual hierarchy, and clarity.
- Improved internal operational workflows through optimized interface navigation and information architecture.
- Stack: **Oracle APEX**

Certifications

Google Cloud Computing Foundations Certificate, Google Cloud October 2025

- Foundational certification covering **Cloud Infrastructure, Compute Engine, Cloud Storage, and Identity and Access Management (IAM)**.
